PROFILE

I am a dedicated software engineering student passionate about crafting elegant solutions to complex problems. With a focus on Web Development, I thrive on turning ideas into reality through clean, efficient code.

EXPERIENCE

- Dec 2024 – present

Freelance , Upwork

 - Managed the full development cycle, from concept and prototyping to deployment and post-release updates
 - Designed and implemented interactive, mobile-friendly UIs using Angular and Tailwind CSS
 - Built scalable backend services with .NET and integrated cloud storage via Amazon S3 and Integrated third-party tools
 - Communicated directly with clients to gather requirements, provide regular progress updates, and ensure satisfaction with deliverables.
- Jun 2025 – Aug 2025

Intern Software Engineer, Proxym-group

 - Developed an AI-powered analytics system for banking insights using Python, pandas, and Elasticsearch for data ingestion, processing, and indexing.
 - Built interactive dashboards in Power BI to visualize customer behavior, churn risk, and process efficiency.
 - Designed a rule-based chatbot with Gradio to deliver real-time banking insights and data-driven responses.
- Jun 2024 – Aug 2024

Intern Software Engineer, International Tunisian Services

 - Built a doctor shift-planning platform using Angular for the front end and .NET Core with SQL Server for the backend data management
 - Integrated Google OR-Tools to generate optimized, conflict-free schedules respecting staffing ratios, work-hour limits, and time off requests
 - Refined database schema and API performance, reducing schedule generation time by 40% for large hospital departments

SKILLS

TypeScript
JavaScript
Angular
.NET
C#
HTML & CSS

Python
MySQL
PostgreSQL
Git
CI/CD
Docker

EDUCATION	Higher institute of Sciences Applied and Technology ,Sousse 2021-2026
	Computer Science Engineering
	Grombalia high school 2017-2021
	Bachelor in Computer Science

EXTERNAL PROJECTS	SmartThesis
	Developed a web application for managing final-year thesis projects, including student, teacher, and department management, with automatic jury generation and presentation scheduling. Built with React, Express.js, and MongoDB, and deployed to streamline academic workflows.
	ExpenseTracker
	Developed a personal finance web application for tracking income, expenses, and budgets, featuring categorized transactions and spending analytics. Built with .NET and Angular, providing a responsive and interactive user experience to streamline personal financial management
